

PERSONAL PROFILE

Senior Software Engineer with 5+ years of experience building business-critical event-commerce, creator, marketing, and marketplace products at Eventbrite. Specializes in React, TypeScript, frontend architecture, API-driven applications, and full-stack feature delivery. Led social publishing integrations, monetization launches, and AI-enhanced campaign workflows. Product-minded veteran leader experienced in mentorship, production debugging, and cross-functional execution.

SKILLS

Languages & Frontend: TypeScript, JavaScript (ES6+), Python, HTML5, CSS, React, Next.js, Redux, React Query, Storybook

Backend & Cloud: RESTful APIs, backend services, Backend-for-Frontend (BFF), API contracts and integrations, Meta Graph API, AWS, Docker, service-oriented architecture

Testing & Observability: React Testing Library, Cypress, Datadog, performance analysis and optimization

Analytics & Experimentation: Heap, Amplitude, StatSig, split.io, feature flags, A/B testing

Practices: Accessibility, GitHub, component-driven architecture, production debugging, mentorship, Cursor AI, Claude

WORK EXPERIENCE

Eventbrite - Senior Software Engineer (2025 - 2026)

- Led full-stack delivery of an Instagram publishing workflow, enabling creators to publish event marketing content through React and TypeScript interfaces, Next.js backend services, media-processing logic, and Meta Graph API integrations.
- Owned the end-to-end integration across validation, authentication, permissions, API contracts, media uploads, previews, and publishing states; secured Meta approval after 17 submission cycles to unblock launch.
- Partnered with frontend and backend engineers across the U.S., India, and Spain to diagnose production issues, coordinate service-layer fixes, and deliver reliable functionality across system boundaries.
- Mentored engineers on React context patterns, backend integrations, codebase navigation, and cross-service debugging, increasing team independence and delivery capacity.

Eventbrite - Software Engineer II (2023 - 2025)

- Led frontend delivery for an email-campaign rebuild under a compressed timeline, modularizing React components and helpers for stop-send, CTA customization, campaign workflows, and future migration, powering over 20 million email sends
- Shipped ChatGPT-enhanced email campaign features used 7,600+ times by 3,287 unique users by the end of Q2.
- Helped deliver Pricing & Packaging and Boost launches contributing to product work exceeding \$4M ARR, 178% YoY growth, \$100K Boost PAYG revenue, and \$52K+ P&P revenue within 29 days.
- Expanded ownership beyond the core team by diagnosing and fixing a critical ELFS page crash and related UI defects in an unfamiliar system, improving production stability.

Eventbrite - Software Engineer I (2021 - 2023)

- Shipped production features across collections, messaging, pricing, segmentation, and email campaigns in a large React and TypeScript codebase, with React Testing Library coverage, feature flags, release validation, and Heap/Amplitude instrumentation.
- Refactored legacy class components into smaller functional components, eliminated workspace console warnings, and improved maintainability through frontend tech-debt cycles.
- Resolved hard-to-reproduce production bugs involving race conditions, missing links, daily-send limits, and analytics/UX edge cases.

EDUCATION

Nashville Software School

Software Development Bootcamp

Norwich University

Bachelor's Degree

MILITARY LEADERSHIP

United States Army - Captain | 2007 - 2012 | Iraq, Afghanistan, Germany

- Awarded Bronze Star for actions in Iraq.
- Led multinational teams and planned standards-based training for 100+ soldiers in high-accountability operational environments.

EARLIER PROFESSIONAL EXPERIENCE

Sales & Hospitality | Nashville, TN | 2012 - 2021: Developed a strong customer-facing foundation through sales and hospitality roles, with a focus on clear communication, relationship-building, and staying composed in fast-paced environments.
